

## Letter from the President, Herb Burnham

If you have been reading previous newsletters you know that the Lake Hartwell Association has been very actively advocating for the Corps of Engineers to apply adaptive management of water releases in order to optimize the use of available water, and keep lake levels higher, especially during periods of drought. If you have been following how the Corps has managed the abundance of water we have experienced throughout the Savannah Basin over the past several months, you have seen the Corps applying adaptive management. In other words, they continuously monitored water levels, inflows, and short term weather forecasts; then adjusted releases accordingly in order to prevent severe flooding, both upstream and downstream. This is a fine example of what LHA has advocated during periods of drought...real time monitoring and adjustments of flows to keep as much water as possible in the lakes for as long as possible. It could eliminate the need for rule curves such as drought levels and winter rule curves that are based on averages of historical data.

We have been hearing how climate change is a recent "new" problem that's creating drastic weather changes. Well, the earth's climate has been changing since its creation and living species that have learned to adapt to those changes have survived while

others have not. I remember looking in awe over the Saudi Arabian desert years ago and thinking that massive area of dry talcum-powder-fine sand was once covered by jungle foliage and animals that are now the huge deposits of mid-eastern oil. This is not to suggest that our part of the world will someday be a desert, rather to make the point that the earth's climate has and will always be changing, and we must constantly learn to adapt with changes...especially in the management of our water. In short, learn from the past, but be adaptable in the present, and prepare for the future.

We in the Savannah River Basin have been presented a unique opportunity...one I pray will not be passed up. While the Corps of Engineers and the two states are getting ready to embark on a study to improve how droughts are managed, commonly referred to as "phase two", Clemson University has received federal grant money to install and test a new generation of sensors in the Savannah Basin that will allow for real-time monitoring. Any number of sensors could eventually be placed at key locations throughout the basin to provide water managers and environmental agencies with all the data they would need to make real time decisions based on current conditions. In other words, allow for adaptive management and optimization of water storage in the lakes, and flows downstream. The Savannah Basin could be the first to implement this new technology, referred to as the "Intelligent River".

As you may recall, our spring newsletter covered the joint meeting

of the new congressional water caucuses that were formed in the two state assemblies. These two caucuses may well be the key to the Intelligent River becoming a reality since it will require funding and technical support from both states. And we all know how difficult that becomes considering today's budget reductions. LHA, along with other stakeholders throughout the basin will need to advocate like never before. Therefore, it is so important that we continue to build our member base...our voice gets stronger with every additional member. Now that we have a full pool of water for the summer season it's easy to relax and consider the "problem solved". Nothing could be further

from the truth. There will be more droughts, and the time to prepare is before they happen. So, I am once again urging everyone to bring in at least one new member over the following year. There is also a need for active members to join our board and various committees as pointed out in a separate article in this newsletter.

Now a more personal note, this will be my last "letter from the president". As of July 1, I have assumed the new role of executive director and will receive very modest compensation. Several years ago LHA's administrative duties had grown to a point that it was unreasonable to expect a volunteer to handle, and a paid executive administrator was approved. I've had the honor and privilege of being LHA's volunteer president for more than four years. In the past two years the association has grown significantly, and has become more involved in politics, with the media and other activities that demand far more time and attention than should be expected of a volunteer. So, at the June 10th

board meeting after months of review, debate and consideration, the position of executive director was approved, and I was selected to fill it for a 12 month period. My duties will be those normally expected of a chief operating officer. By removing many of the time consuming duties from the president's position, it becomes far less demanding and should attract more volunteers. Any member interested in being considered for the new president's role should email our executive administrator at lakehartwell@charter.net. I will be pleased to review the duties of the position, time expectations, and so forth with anyone who may be interested.

**Vote on Board Nominee**

Ashley Griffin Widener is a native of Pendleton, SC and is Vice President of Widener & Associates located

in Hartwell, GA. After working and raising a family in the Atlanta area, Ashley and her husband decided to build on property that has been in her family since the construction of Lake Hartwell. She has grown up enjoying the benefits of Lake Hartwell and now has the privilege of living on the lake in Hart County.

She is a graduate of University of Georgia and has served on the Fulton County Board of Education (GA). Her hobbies include enjoying the lake, golf, hiking and gardening.

Please send your vote on this nomination to  
[info@lakehartwellassociation.org](mailto:info@lakehartwellassociation.org).

# LHA ANNUAL MEETING SET FOR OCTOBER 5, 2013

LHA Annual Meeting in October, 2012 - Photos provided by Vernon Sauer

The 2012 LHA Annual Meeting at Kresge Hall, Clemson Outdoor Lab, was so well attended, and the response was so positive, we're planning to do it again on Saturday, October 5, 2013. (There is no Clemson game on that date!)

Kresge Hall is the perfect place to appreciate the special resource that is Hartwell Lake. Its setting in the woods, with wide porches, patios, and easy access to the water, invites us all, and doesn't disappoint.

Once again the program will begin at 10:00 a.m., with lunch to follow the meeting. Reservations are required, and you can make them by emailing [membership@lakehartwellassociation.org](mailto:membership@lakehartwellassociation.org). We'll have an email out in early September to remind you to get your reservations in by a certain date.

A new commander will be in charge of the Savannah River Basin for the Corps of Engineers at the time of our meeting, Col. Tickner, and we're counting on him to answer your

questions and give us the latest news of the COE's activities and lake management.

Additionally, we'll have presentations of a more scientific nature, and as always, a summary presentation of LHA activities over the last twelve months.

Then after lunch, walking tours and more in-depth hikes and even some environmentally beneficial activities will be offered. More specific details will be available shortly. Please indicate your interest in these activities when you make your reservation for the meeting/lunch.

We look forward to seeing you October 5th at Kresge Hall –

***FOR THE SAKE OF THE LAKE***

Former LHA President, Herb Burnham, during his presentation

Col. Jeffery Hall, USACE, during his presentation last year

# CORPS HOSTS MEDIA DAY ON LAKE HARTWELL

The Corps of Engineers hosted an on-water lake safety event for the media at Big Oaks Recreation Area on July 2nd. Its purpose was to increase safety awareness going into the long Independence Day weekend. Local newspapers and WYFF-TV (channel 4) attended. The Corps of Engineers, the SC Department of Natural Resources, and the sheriffs' departments of Oconee and Anderson counties displayed their patrol boats. Rangers and deputies who operate the boats gave briefings and answered questions. Detective Rusty Ables, full time officer in charge of Marine One, Anderson county's lake patrol boat, demonstrated a new foam fire extinguishing system that is environmentally friendly and effective on all types of fires from a distance of 50 feet.

# THE NEW CLEMSON MARINA AND CAMPGROUND

The Lake Hartwell Association is pleased to welcome one its newest members, the new Clemson Marina. Over the past two years Classic City Marinas has spent several million dollars rebuilding and modernizing the old Seneca marina site, located across the Seneca River branch of Hartwell Lake from the Clemson campus. It is now a full service marina including a full service grill and bar with a covered open air dining area, courtesy guest docks, a full service pump out and gas dock, boat storage and repair services, boat rentals, slip rentals, dry dock storage, and other marine services. A variety of water related courses will be available including water skiing, wake boarding and fishing.

Clemson fans will love the fact that, while dining or having a cocktail, they can look across the river and see the Walker golf course, and from the rental slips view Death Valley and the main campus. The marina has an outstanding website that covers every detail including photos, contact numbers, maps, and service hours of specific operations. To access go to [www.ClemsonMarina.us](http://www.ClemsonMarina.us).

## THE ASSOCIATION NEEDS YOUR HELP

Volunteering for a good cause is something most Americans are inclined to do, and something that can be very gratifying and fulfilling. The biggest problem most of us have is taking that first step. It helps if you have strong feelings about what you are volunteering for, and truly feel you can “make a difference”. I know because I have been there many times, and frankly, have seldom taken that first step because of the uncertainty of the value of the objective and/or how my contribution would make a difference.

I initially volunteered to serve on the Lake Hartwell Association board of directors because I felt very strongly about Hartwell Lake and its value to this region, and because after years of looking for the perfect place to retire in the southeast, I chose Hartwell Lake. It's one of the cleanest and most beautiful lakes on which a person can build a home. I want to keep it that way, and the Lake Hartwell Association is dedicated to that purpose. Serving as the association's president for the past four years has been one of the most interesting and gratifying experiences of my life.

If you have read the president's letter on the front page of this issue, you know I am assuming the new role of executive director, and will continue to do whatever it takes to ensure the association steps up to meet its objectives. One of the first is to find my replacement as president.

The board is also looking to fill the positions of Board Secretary and Technical Committee Director. Volunteers to serve as covekeepers, membership coordinators, lake-cleanup coordinators, and event assistants are also needed. If you may be interested in helping with any of these or others noted on the last page of this newsletter, please email Herb Burnham, LHA Executive Director at [herbburnham@bellsouth.net](mailto:herbburnham@bellsouth.net) and I will be pleased to discuss your concerns and/or questions.

# Savannah District Change of Command

All photos taken by Vern Sauer

Command of the Corps of Engineers Savannah District, by regulation, changes every three years. The latest change took place on Friday, July 19, 2013 in Savannah with Col. Thomas Tickner replacing Col. Jeffery Hall in a formal Change of Command ceremony. The tradition dates back to Roman Empire days and was adopted by the U. S. Army in the 18th century. The first was when General George Washington was passed the American Flag to accept command of the Continental Army at Boston in 1776.

Traditional "Passing of the Flag" at the Change of Command Ceremony

Several members of Lake Hartwell Association were invited to attend the ceremony and the farewell dinner for Col. Hall the previous evening...the only such group in attendance. Herb Burnham was asked to address the dinner guests regarding its working relationship with the Corps and more

Col. Tickner makes comments after taking command

specifically Col. Hall, who will be retiring with 29 years of service.

The Change of Command ceremony was attended by hundreds having an interest in the Corps' management of the Savannah River Basin and the engineering and construction work on the eleven Army and Air Force bases in the district, as well as the Savannah Harbor. The Savannah District is responsible for more than 25% of all Corps of Engineers work in the entire nation.

Col. Tickner is a highly decorated officer with 24 years of service in the Corps of Engineers. He is a Civil Engineering graduate of Penn State and holds several advanced degrees in engineering and military sciences. He, his wife Sheri, two sons and twin daughters are looking forward to moving to Savannah and visiting our beautiful lakes.

# ANDERSON SHERIFF'S BOAT HAS BEEN BUSY

Marine One has had a busy and successful six months. In addition to normal patrol activities to enhance boating safety and crime prevention, assisting with rescues and supporting special events, Marine One's mid-year report shows that seven (7) boat thefts were investigated and all boats were recovered, three (3) attempted boat thefts were stopped, twelve (12) larcenies from docks were investigated, thirteen (13) automobile break ins at boat ramps were investigated, and two (2) lakeside residential burglaries were investigated. More than 75% of the crimes involving property, have been solved with four suspects arrested, and a warrant issued for another.

Detective Rusty Ables, who is in charge of Marine One patrol boat, has been busy. In addition to the above he has

recently completed Sea School and passed the exams required to get his Coast Guard Captain's License. Congratulations Rusty!

If you live in Anderson County and appreciate what Marine One has accomplished, or if you have questions or suggestions, please let the Sheriff's department know by emailing [marinepatrol@andersonsheriff.com](mailto:marinepatrol@andersonsheriff.com). Likewise, if you live in Oconee County you may email [jwatt@Oconeelaw.com](mailto:jwatt@Oconeelaw.com). If you live in one of the other four counties bordering the lake and would like to have similar safety and security coverage for you county's shoreline, contact your respective sheriff's department, and let LHA know as we have been working closely with Marine One and Anderson County, and will continue to advocate for more safety and security on the lake.

## A WORD TO THE WISE... AND TO THOSE WHO CARE!

### FROM LAKE HARTWELL ASSOCIATION

Just a reminder that the Corps Hartwell Lake Clean-up Campaign will begin in mid-August and run to September 28th. And on Saturday, September 28th, the Lake Hartwell Association, with the Corps, will thank all volunteers who participated in the clean-up with a picnic at Big Oaks Recreation Area.

So now is the time to get your team ready – your neighborhood, your extended family, your Boy Scout Troop, your church group, or you and a couple of buddies, whoever is willing and able, to help rid the Lake Hartwell shoreline of UNSIGHTLY STUFF.

Any questions? Contact Nancy Sumners, Natural Resource Specialist, Hartwell Dam and Lake, 706-856-0329.

## Lake Hartwell Summer Boating Safety Tips

- 1. Be Weather-wise**  
Always check local weather conditions before departure- TV and radio forecasts can be a good source of information. If you notice darkening clouds, volatile and rough changing winds, or sudden drops in temperature, play it safe by getting off the water.
- 2. Follow a Pre-Departure Checklist**  
Proper boating safety means being prepared for any possibility on the water. From compliance with fire safety regulations to tips for fueling up, following a pre-departure checklist is the best way to make sure no boating safety rules or precautions have been forgotten.
- 3. Use Common Sense**  
One of the most important parts of boating safety is to use your common sense. This means operating at a safe speed at all times, especially in crowded areas. Be alert at all times, and steer clear of large vessels and watercraft that can be restricted in their ability to stop or turn. Also be respectful of buoys and other navigational aids, all of which have been placed there for one reason only- to ensure your own boating safety.
- 4. Designate an Assistant Skipper**  
Make sure more than only one person on board is familiar with all aspects of your boat's handling, operations, and other boating safety tips. If the captain is injured or incapacitated, it's important to make sure someone else can get everyone else back to shore.
- 5. Make Proper Use of Lifejackets**  
Did you know that the majority of drowning victims are the result of boating accidents were found not to be wearing a Lifejacket? Make sure that your family and friends aren't part of this statistic by assigning and fitting each member of your onboard team with a lifejacket-prior to departure.
- 6. Avoid Alcohol**  
Practice boating safety at all times by saving the alcohol for later. The probability of being involved in a boating accident doubles when alcohol is involved, and studies have also shown that the effect of alcohol is exacerbated

# HARTWELL DAM TOUR DATES ADDED

Many Lake Hartwell Association members have taken advantage of the opportunity to tour through the Hartwell Dam and Power Plant, learn of its many functions and complex engineering, and view the lake from the top of the structure. And the view is spectacular!

The response from members has been enthusiastic in all cases. And the Corps personnel guiding the tours have been very knowledgeable and eager to answer any questions.

**“This tour was excellent. Extremely interesting and informative. Anyone who is a shareholder in the interest of Lake Hartwell should take advantage of this opportunity.”**

*LHA member, Todd Williams*

**“In 18 years of providing tours, I have never had an opportunity to show guests what the inside of**

**a penstock looks like. However I had my first - both tours were able to look inside a de-watered penstock! It was a rare treat.”**

*Sandy Campbell, Supervisory Park Manager, COE, and tour guide.*

Because there has been such great feedback on the dam tours, two more dates have been added, August 23rd and September 6th, each date with tours at 1:00 p.m. and 3:00 p.m. If you haven't been able to attend before, now is the time to sign up for these added tours. To do so, email [membership@lakehartwellassociation.org](mailto:membership@lakehartwellassociation.org). It's a tour not to be missed!

**FOR THE SAKE OF THE LAKE**

## What is a Rain Garden?

A rain garden is a landscaped depression that intercepts runoff and allows the water to slowly infiltrate into the groundwater table. As well as intercepting runoff that could possibly add to flooding and stream erosion problems, the rain garden allows nature to play a role in removing pollutants from stormwater runoff that could otherwise affect the water quality of nearby lakes, rivers, and streams. Plants use excess nutrients for growth, sediment gets trapped in the rain garden, and the rain garden becomes a landscaped feature in your yard that is also habitat for bees, butterflies, and birds. Plus, a rain garden uses water from your rooftop and driveway for irrigation, saving you on your water bill.

## Welcome Aboard, New Members!

Please welcome the following members, who have joined LHA since our last newsletter.

### New Family Memberships

## LHA Mission Statement

**WE** will develop and establish the Lake Hartwell Association as an organization that promotes and encourages cooperation, assistance and information exchange among those concerned with Hartwell Lake and the Savannah River Basin.

**WE** will collect and distribute information on matters affecting Hartwell Lake.

**WE** will provide a forum to collectively represent our membership on issues that pertain to the development, preservation and comprehensive management of Hartwell Lake.

**WE** will maintain liaisons and communications between Lake Hartwell Association and educational, governmental, scientific and other communities.

## LHA COMMUNITY & BUSINESS PARTNERS

# THANKS FOR YOUR SUPPORT!

We are especially thankful for the Community and Business members that generously support LHA!  
Their contact information and website links are available on the LHA website!
